PROFILE SUMMARY

Results-driven Full Stack Developer with expertise in building scalable web and mobile applications using Java (Spring Boot, Hibernate) and the MERN stack (MongoDB, Express, React, Node.js). Experienced in designing RESTful APIs, implementing secure authentication with JWT, and working with both relational and NoSQL databases including MySQL and MongoDB, along with cloud-based services such as Firebase. Strong foundation in Layered Architecture, Clean Code, and SOLID principles. Skilled in containerizing applications using Docker and applying cloud-native development practices to deliver production-ready solutions.

TECHNICAL SKILLS

- Programming Languages: Java, JavaScript, TypeScript, Python, SQL
- Frontend: React, React Native, Tailwind CSS, Bootstrap, JavaFX
- Backend: Spring Boot, Spring Security, Node.js, Express
- Databases: MySQL, MongoDB, Firebase
- DevOps: Docker, Git
- Tools: Postman, Figma

PROFESSIONAL EXPERIENCE

IJSE – Software Engineering Trainee

Feb 2024 – Present

- Designed and developed enterprise-grade web applications using Java Spring Boot, ensuring scalable and maintainable architecture for high-traffic systems.
- Built React front-ends with efficient state management for responsive and seamless user experiences.
- Developed secure RESTful APIs with JWT authentication and Spring Security for robust access control.
- Integrated and optimized MySQL and MongoDB databases, ensuring data integrity and high performance.
- Streamlined development workflows and deployment processes using Docker, Git, and Maven.

PROJECT EXPERIENCE

SkillLink – Mobile Service Marketplace (React Native Application)

2026

- Developed cross-platform mobile marketplace application using React Native (Expo).
- Implemented Firebase Authentication for secure user login and session management.
- Integrated Firestore for real-time cloud database synchronization.
- Designed service provider profile management and booking workflows.
- Optimized mobile UI/UX for Android and iOS performance.

EduFlow – AI-Powered Education Management Platform (MERN Stack)

2026

- Built full-stack education management system using MongoDB, Express.js, React, and Node.js.
- Designed secure RESTful APIs with JWT-based authentication and role-based access control.
- Integrated AI capabilities using OpenRouter API for intelligent platform features.
- Implemented cloud-based image storage using Cloudinary.
- Deployed scalable frontend on Vercel with clean full-stack architecture.

JustRide – Taxi Booking System (Spring Boot Web Application)

2025

- Developed full-stack ride-booking system using Spring Boot, MySQL, and Hibernate.
- Implemented JWT authentication and Spring Security for secure access control.
- Designed REST APIs for ride booking, driver management, and admin operations.
- Integrated Leaflet.js for GPS-based ride tracking and map visualization.
- Applied layered architecture to ensure scalability and maintainability.

Aquarium Management System (Java Desktop Application)

- Developed desktop management system using Java and JavaFX.
- Implemented MVC and layered architecture for clean system design.
- Integrated MySQL database for inventory and operational management.
- Generated professional reports using JasperReports.
- Managed project dependencies and build lifecycle using Maven.

EDUCATION

Undergraduate in Software Engineering
IJSE Institute of Software Engineering
(2024-2026)

GCE O/L & A/L
Matara Central College
(2015-2018)
